Bachelor of Science in Computer Science, Western Governors University, 2021

Relevant Coursework: Software Engineering, Machine Learning, Data Structures & Algorithms I & II, Software I & II, Discrete Mathematics I & II, Advanced Data Management, Software Quality Assurance

ITIL Foundation Certificate in IT Service Management

Google IT Support Specialization | CompTIA Project+

Professional Experience

Career Note: Temp Jobs | May 2021 - January 2023

- Oversaw multiple day-to-day responsibilities as Night Auditor at Watson's Regency, including preparation of daily reports, attending guest queries, and answering high-volume calls
- Processed several dozen credit card and cash transactions daily while unloading and stocking merchandise for Oasis Market
- Managed diverse responsibilities as Night Auditor/Maintenance for the Port O Call Hotel, including daily reporting, phone call management, maintenance, and workshop and pool cleaning
- Reduced reporting man hours by 5% by automating daily report creation through the utilization of Excel Macro

American Institute for Economic Research | Great Barrington, MA

Information Technology Intern | September 2021 - November 2021

- Compressed several thousand image and PDF files via Linux command line and Bash scripts in line with project requirements, leading to a 30% reduction in website storage needs
- Evaluated website frontend Javascript and CSS to highlight irregularities and implement corrective actions, leading to 15% reduction in unnecessary resource loading and 15 point improvement in lighthouse performance score
- Identified and detached 5 redundant and performance-heavy WordPress plugins by performing an in-depth evaluation of the PHP source code while reducing server response time
- Highlighted and deleted high-volume expired entries using SQL queries to optimize database performance
- Automated downloading for hundreds of ICS files by performing web scraping via Python and Selenium browser automation, resulting in 5% reduction in man-hours for the organization
- Developed a frontend interface via Javascript and HTML to interact with US Census RESTful API and query desired datasets for the organization
- Planned and build a custom NTF smart contract on the Ethereum Blockchain with a frontend web-based interface in Vue.js to achieve set objectives in line with organizational SOPs and guidelines
